

Your Strategy. Implemented.

One team, working remotely, united in one goal... ...designing and executing **coordinated plans** in a **virtual environment**

Our **custom virtual rooms** provide the opportunity to bring remote team members together, prior to them embarking on a key initiative or project. The team has the tools to **build collaboratively** a vision of how they will work together to deliver. A 'helicopter view' of the workflow 'swimlanes' ensures that there is a workable plan. Detailed mapping of the project ensures accurate and timely delivery - driven by the right decisions at the right time.

SERVICES

- **Virtually Enabled Integrated Planning Sessions (IPS)** for key projects and programmes
- **Virtually Created End-to-End (E2E)** process maps for excellence in execution of signature processes, e.g. innovation delivery, artwork production, launch excellence, business process redesign for working remotely
- **Key Deployment Workshops** - visioning, strategy into action, agility, initiative acceleration, transformational change, top-to-bottom alignment, organisational redesign. Any process built from Post-its, flip charts and timelines can be run in our custom virtual rooms

Through a combination of technology and methodology, Skarbek's facilitation optimises the human dynamic, creating a **shared consciousness and commitment to deliver**. Break down functional silos through our collaborative approaches, ensuring that interdependencies are understood, roles are clarified and 'buy-in' is secured. **Turn your strategies into action**, even when key people cannot come together face-to-face.

"This has allowed us to have vital conversations we have never had before on this programme...
we now understand the timings needed to deliver"

Key Programme Leader | Multinational Consumer Healthcare Company
